

## Introduction

The M-TSWMDL(3) limits the angular deflection of M-WM40 and M-WMG40 wobblesticks to three degrees. This limitation is, for example, useful if a greater angular range could lead to collisions of the wobblestick with other devices in the vacuum chamber.

For bump protection the use of an M-WM-TS Parking-/Protection rail is still recommended.

Different limitations of the angle are possible. Please contact us directly if this is desired.

Description	Part Code
Deflection limiter (3 deg.) for wobblesticks DN40CF	M-TSWMDL(3)

## Specifications:

### Materials

Stainless steel 1.4301

### Angular Limitation

+/- 3°

### Bakeout Temperature \*

150°C max.
